

CUNDALL

IT and audio visual

Latham & Watkins

London, UK

Client

Latham & Watkins

Services

IT and audio visual

Architect

Gensler

The expansion of Latham & Watkins business resulted in the take up and fit-out of multiple floors at 99 Bishopsgate along with conference and client liaison areas on the ground floor.

Cundall IT and audio visual consultants worked with client teams in Belgium and the US to define the requirements. We then detailed these into specifications and co-ordinated with our in-house lighting, acoustic and MEP design Engineers. Finally, we monitored the works onsite ensuring the clients expectations were met.

Benefits:

- Assisted Latham's IT and audio visual teams outside the UK, being their team on the ground in London to ensure consistent quality and delivery
- In-house co-ordinated design approach and single point of contact
